Attn: Chemical Right-to Know Program
Ethyl Cyanoacrylate (CAS 7085-85-0)
Registration Number Response to EPA's Comments dated May 28, 2003.

Dear Mr. Hernandez:

Henkel Loctite Corporation appreciates the opportunity to respond to EPA's comments on the Ethyl Cyanoacrylate Test Plan and Robust Summary.

As a result of those comments we have scheduled testing to determine the boiling point and vapor pressure of ethyl cyanoacrylate according to the appropriate OECD methods. Upon receipt of those results we plan to perform AOPWIN modeling to provide an estimate of photodegradation.

A revised test plan is attached.

Upon completion of this testing, a revised Robust Summary will be submitted. It will include the information provided by the testing discussed above and amendments to the Stability in Water and Genetic Toxicity sections as recommended in your comments.

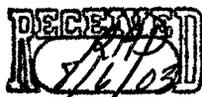

If you have any questions or comments please feel free to contact me.

Sincerely

Henkel Loctite Corporation
