

Ethanol -- Comments of Environmental Defense

Submitted via Internet August 17, 2001.

Environmental Defense appreciates this opportunity to submit comments on the robust summary/test plan for Ethanol.

No further testing is proposed by the Ethanol HPV Challenge Consortium. We agree that the existing data base, including a full NTP study on ethanol with or without urethane, is adequate. We commend the Consortium on their preparation of the test plan justification. It was well-organized, concise and did an excellent job of prioritizing the relevant studies.

Thank you for this opportunity to comment.
