Subject: Benzotriazoles Coalition HPV Proposal

Dear Administrator Whitman,

I am a friend and colleague of Mr. and Mrs. Rieck, who wrote you regarding the proposal of the Benzotriazoles Coalition. I am writing here to also urge you to reject the 12/31/01 proposal of this coalition and to initiate independent testing of Benzotriazoles.

My family has a great deal of concern about the effects of not only airborne benzotriazoles released from Cincinnati Specialties, Inc., but other chemicals released from this facility and neighboring ones. We, in Greater Cincinnati, live in a region with a high degree of concentration of chemical manufacturers. Given the cumulative total and possible effects of the industrial releases from these facilities, I urge you to take the prudent and logical step and initiate independent testing of benzotriazoles.

Respectfully,
John Lucero Criswell
