Re: Aromatic Sulfonic Acids Association (ASAA) Submission of HPV Test Plan and Robust Summaries under the Chemical Right-to-Know Program for benzene sulfonic acid (CAS No. 98-11-3)

Dear Administrator Horinko:

The Aromatic Sulfonic Acids Association submits the attached test plan for benzene sulfonic acid (BSA - CAS No. 98-11-3) including robust summaries in IUCLID format under the High Production Volume Chemicals Challenge Program. Since a significant portion of our test plan uses toluene sulfonic acid (TSA – CAS no. 105-15-4) as a surrogate for BSA, the IUCLID with Robust Summaries is also included for TSA (CAS No. 105-15-4).

Please direct any comments to the ASAA Executive Director, William Smock at William.smock@verizon.net.

Sincerely,

William H. Smock
Executive Director
