Distributed Generation				
Definition: Standard interconnection rules for distributed generation (DG), including renewable energy and combined heat and power				
(CHP), establish clear and uniform processes and technical requirements that apply to utilities within a state. Interconnection				
standards reduce uncertainty and prevent time delays that DG systems can encounter in obtaining approval to connect to the grid.				
Distributed Generation		EPA EV-Built	Taxonomy	
		Environments-Energy		
		Generation		
Definition 1: Small, modular, decentralized, grid-connected or off-grid energy systems located in or near the place where energy is				
used (e.g., combined heat and power, photovoltaic [PV] panels). [State and Local Climate and Energy Glossary]				
Definition 2: Small, modul used.[GPP Glossary]	ar, decentralized, grid-conr	nected or off-grid energy sys	stems located in or near th	ne place where energy is
