

## Terminology Services - Terminology and Acronyms Report

Term	Acronym	Vocabulary	Vocabulary Type	Preferred Term
Bioconcentration Factor	BCF	Environmentally Preferable Purchasing (EPP) Glossary	Glossary and Key Word List	
Definition: Ratio of the concentration of a chemical in an organism to the concentration of the chemical in its surrounding aqueous environment. BCF values are surrogate measures of the bioaccumulation potential of a chemical in organisms in the environment.				
Bioconcentration Factor	BCF	Hazard Ranking System Glossary	Glossary and Key Word List	
Bioconcentration factor	BCF	EPA ExpoBox Terminology	Glossary and Key Word List	
Definition: The ratio of the chemical concentration in the animal (e.g., fish) or plant to the chemical concentration in the surrounding environmental media (e.g., water, soil).				
Bioconcentration Factor	BCF	Pesticides Reregistration Glossary	Glossary and Key Word List	
bioconcentration factor	BCF	Thesaurus of Terms Used in Microbial Risk Assessment	Thesaurus	
Definition: The concentration of a substance in tissue of an organism divided by the concentration in an environmental medium (e.g., the concentration of a substance in an aquatic organism divided by the concentration in the ambient water, in situations where the organism is exposed through the water only). [EPA 2004]

## Terminology Services - Terminology and Acronyms Report

Term	Acronym	Vocabulary	Vocabulary Type	Preferred Term
Definition: For organic chemicals, a BCF that is based on the concentration of freely dissolved chemical in the ambient water and takes into account the partitioning of the chemical within the organism; for inorganic chemicals, a BCF that is based on the wet weight of the tissue. [40 CFR Appendix B to Part 132 (CFR 2013)]
