

Terminology Services - Terminology and Acronyms Report

Term	Acronym	Vocabulary	Vocabulary Type	Preferred Term
Distributed Generation		State and Local Climate and Energy Program Glossary of Terms	Glossary and Key Word List	
Definition: Small, modular, decentralized, grid-connected or off-grid energy systems located in or near the place where energy is used (e.g., combined heat and power, photovoltaic [PV] panels).				
Distributed Generation		Green Power Markets Glossary	Glossary and Key Word List	
Definition: Small, modular, decentralized, grid-connected or off-grid energy systems located in or near the place where energy is used.				
Interconnection Standards--Clean Distributed Generation		State and Regional Policy Tracking Definitions	Glossary and Key Word List	
Definition: Standard interconnection rules for distributed generation (DG), including renewable energy and combined heat and power (CHP), establish clear and uniform processes and technical requirements that apply to utilities within a state. Interconnection standards reduce uncertainty and prevent time delays that DG systems can encounter in obtaining approval to connect to the grid.				
Distributed Generation		EPA EV-Built Environments-Energy Generation	Taxonomy	
Definition 1: Small, modular, decentralized, grid-connected or off-grid energy systems located in or near the place where energy is used (e.g., combined heat and power, photovoltaic [PV] panels). [State and Local Climate and Energy Glossary]				
Definition 2: Small, modular, decentralized, grid-connected or off-grid energy systems located in or near the place where energy is used.[GPP Glossary]
